Malletts Bay, VT is a popular stop on Lake Champlain for transient boaters.

The Hazelett Marine spar buoys will freeze in place with ice over 3 feet thick.

The Hazelett elastic mooring systems can be ready for service in the spring with 10 minutes of work by installing the pendant.

Removal of mooring balls and installing winter sticks is valuable time you could be using on more important projects like, a round of golf with good friends.

The short scope Hazelett elastic mooring system was installed by Barden's Boatyard to keep this ship out of the navigation channel in Sippican Harbor, Marion, MA

The two sailing ships that are bow to bow in the center of this picture are on moorings and risk a small collision that will end up costing thousands of dollars to repair.

This is a typical complaint with chain mooring systems in calm weather. Sippican Harbor, Marion, MA.

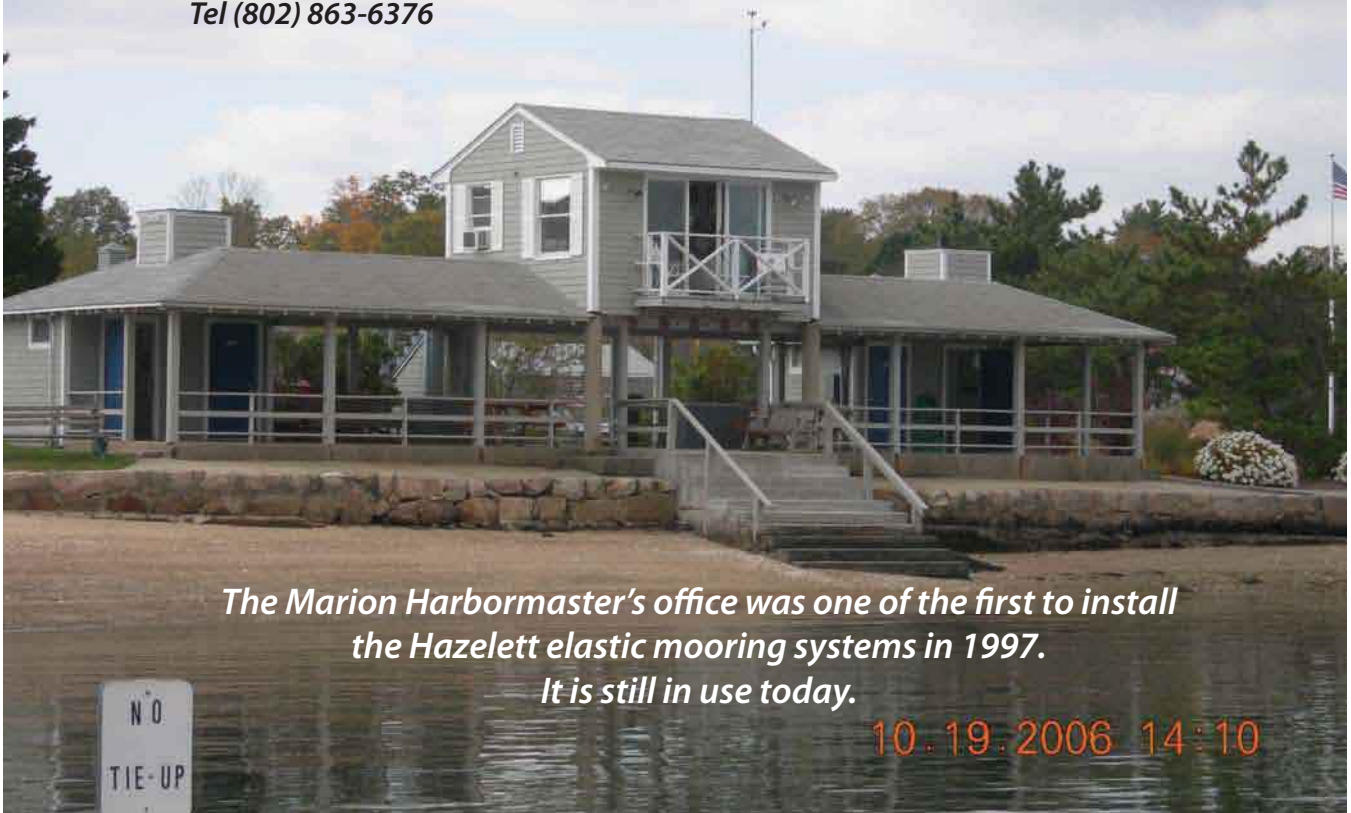

No part of the Hazelett elastic mooring system will drag the bottom so the boat is free to move.
